***Claim Rejections under 35 U.S.C. 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 13,14 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for derivatives named in instant specification, does not reasonably provide enablement for derivatives not named in the instant specification. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make / use the invention commensurate in scope with these claims. Applicant does not use language such as --- By derivatives we mean ---. Examiner suggests that applicant uses Markusk language in the claims to name derivatives disclosed in instant specification.

2.The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 13,14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. The term "derivatives" in claims 13 and 14 is a relative term which renders the claim indefinite. The term "derivatives" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be

reasonably apprised of the scope of the invention. See Examiner's explanation in 35 U.S.C. 112, 1st paragraph rejection above.

***Allowable Subject Matter***

Claims 1-12 are allowable. The prior art does not teach or suggest the instant organosilicone compounds.

***Telephonic Inquiry***
